ABOUT ME

I'm a Software Engineer based in Florida, USA, with a strong passion for web development. My web dev journey started as a team player, helping to build an E.R.P. software solution for a tech services company. There, I had fun, and also the opportunity to grow and hone my skills using frameworks such as **Angular** and **Spring Boot**.

EXPERIENCE

Frontend Engineer 📍 SQUAADS

OCTOBER 2021 - OCTOBER 2022

I worked under SCRUM from home and felt the teamwork at any time. I was on daily meetups, sprint planning, code reviews, pair programming, writing **Ionic** + **Angular** UIs as per Figma design.

Frontend Engineer 📍 GS1 Uruguay

SEPTEMBER 2020 - FEBRUARY 2021

From home, I collaborated with the team using **Angular** and **Spring Boot** to develop use cases. I did teamwork and crafted user friendly and intuitive UIs.

Full Stack Engineer 📍 Tecnomatica

JUNE 2018 - MARCH 2022

From office and home, I worked with the team using **Angular** and **Spring Boot** frameworks, developing use cases. It was about teamwork, defining nice and intuitive UIs as well as the business logic behind those UIs.

ABILITIES

Angular	SASS
Ionic	SCRUM
JavaScript	OOP
Cypress	Atomic Design
RxJS	Git, Git Flow

PROJECTS

ErasMoo — Social Network

Mobile social network application designed for Erasmus students in Europe.

Catálogo — e-commerce
